

BRIAN ANDERSON

ASSOCIATE ■ SECURITY | CONTROLS

CAREER SUMMARY

My career began in the Military in communications systems, and have been in the IT and security industry for more than 15 years. Specializing in security integration, risk assessment, and wireless infrastructure design, my projects have ranged from several industrial, healthcare, education, and government facilities.

It brings me a great sense of pride to be involved in the design and implementation of systems that provide a safer more efficient facility to live or work in. Knowing that the hard work I put into a project could potentially save a life or solve a crime makes me want to work that much harder.

EDUCATION

Utah State University
BS Business Management
U.S. Army AIT, Communications

AFFILIATIONS

American Society for Industrial Security (ASIS)
Board of Directors
