

JERRY BURNSIDE

PRINCIPAL

CAREER SUMMARY

I started with BNA Consulting over 40 years ago. During my first year, I worked as a draftsman and I've been a designer for the past 42 years. I've been involved in the design of electrical systems for over 700 K-12 school district projects throughout the States of Utah and Wyoming and have worked with 33 of the School Districts in Utah. My areas of expertise are in design, cost estimating, field investigation work, and construction administration. Besides schools I have experience in hospitals, retail, government, churches, and temples. It's rewarding to me to understand the intent of our clients and help to bring those visions to life. Some of the work I've done can be seen- not only across the Salt Lake Valley, but throughout the country. I've enjoyed mentoring and working with many other experts in our industry and seeing them grow and progress in their own careers. Our industry has experienced significant changes over the life of my career in terms of the tools we use as well as the technology we design. I am passionate about the institutional knowledge I can offer as well as my familiarity with many of the past projects our clients have successfully completed.

EDUCATION

University of Idaho, 1972-1973
